

A to Z of Maintenance Best Practice

Date		(\$) Fees	
18 February -22 February 2024	Kuala Lumpur	3500	Register Now

Why Choose this Training Course?

Leading companies view effective maintenance management as a high leverage contributor to business profitability, through its impact on equipment capacity, product quality, health, safety and environment, and the cost of production.

This comprehensive 5-day course will benefit both qualified new professionals, as well as experienced professionals who might need to refresh their skills. It covers the fundamentals of modern Maintenance Management and provides a guideline on how to establish best practice maintenance.

What are the Goals?

- To provide a comprehensive guide to maintenance management best practices.
- To equip participants with the necessary understanding, techniques and tools to establish a framework for maintenance best practice in their organisations that will contribute to maximum business success.
- To provide an opportunity to discuss the application of these best practices.

Who is this Training Course for?

It is recommended that all Production, Maintenance, Reliability, Engineering management and technical support staff attend this high-level management training course.

How will this Training Course be Presented?

This course will be facilitated by an experienced maintenance specialist and will be conducted as a highly interactive work session (as opposed to lectures), encouraging participants to share their own experiences and apply the course material to real-life situations. Seminar size will be limited in order to stimulate discussion and efficiency of subject coverage. Each delegate will receive an extensive reference manual, as well as case studies, while worked out solutions will be handed out to the delegates on conclusion of group discussions. Throughout the course, delegates will be encouraged to identify what they can do to enhance Maintenance Management in their organisations.
