

Program Management Professionals (PgMP)

Date		(\$) Fees	
20 April -24 April 2025	Kuala Lumpur	3500	Register Now

Why Choose this Training Course?

Program management is the process of managing several related projects, often with the intention of improving any organization's performance. The discipline of program management requires a refined set of business and leadership skills that are vastly different from that of a project manager. However being an effective program manager still requires a firm foothold in project management as the discipline of program management is the next logical step in the career progression.

This program management training course focuses on core disciplines required to deliver strategic objectives. It includes a walk through the entire life cycle of a program while facing the types of realistic challenges that are encountered in any program. The training course will provide the tools and techniques for program governance, program planning, effectively managing stakeholders and ensuring that your program realizes its benefits and defined objectives.

The course is designed to achieve the Project Management Professional (PgMP®) certification.

This training course will feature:

- The steps needed to complete your exam application and meet the required criteria
- Understand and prepare how to pass the PMI® PgMP® certification examination
- Navigate the processes and knowledge areas of The Standard for Program Management 3rd Edition
- Use effective program management tools and techniques
- Identify and implement best practice program management governance

What are the Goals?

- Understand terms, acronyms, and formulas specific to PgMP®
- Learn the risk processes and knowledge areas specific to the Program Management Standard
- Recognize inputs, tools and techniques and outputs for program management
- Comprehend test taking strategies
- Understand PMI's® specific methods, processes and expectations for managing programs

By the end of this training course, participants will be able to:

- Relate program delivery to business / strategic objectives
- Initiate a large-scale program to implement organisational strategy
- Manage, plan, execute and control a successful program consisting of multiple, related projects

- Ensure the realisation of project and program benefits
- Effectively manage stakeholder relationships
- Report and control of programs in an effective manner that utilise best practice reporting tools
- Analyse methods essential for PgMP® exam success
- Align your program management experience with PgMP® terminology and definitions

Who is this Training Course for?

The Project Management Institute's (PMI's) PgMP® defines the global standard of best practices for program management professionals. As a result of attending this course, you will be equipped with the knowledge and skills to effectively navigate the program management discipline and successfully prepare for and pass the PgMP® certification exam.

This training course is suitable to a wide range of professionals but will greatly benefit:

- Professionals who have been directly involved in project and program management
- Professionals who are working as project managers or key project or program team members
- Those who want to get a recognized Program Management qualification and who recognize risk management as a core part of their professional experience

How will this Training Course be Presented?

This training course will utilize a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. This includes case study presentation, lecture-based presentation, video and audio inserts, simulated exams and exam practice.
