١٣ يوليو - ١٧ يوليو ٢٠٢٥

### Course Overview

This course is aimed at introducing the power-substation layout and design to utility and industrial engineers. The course will cover substation layout, design, grounding and

protection. The course will be supported by practical design examples

### Course Objective

To improve the skills of engineers involved in design, operation and maintenance of electric power substation. A degree in electrical engineering is recommended to gain aximum benefit from the course

## ? Who Should Attend

Engineers involved in design, operation and maintenance of power substations.  
A degree in electrical engineering is recommended to gain maximum benefit
