Why Choose this Training Course?

This intensive course will provide you with the many required and demanding attributes to ensure you effectively manage your Security Management program and projects. This course will provide how your personnel and systems must integrate and support the business in order to secure key assets, rather than restrict its operation.

As quickly as companies develop, so are the risks and threats that they face from both internal and external sources. Some of these threats, security management can control directly; others may require additional executive support. Successful security management will ensure that the company assets have been identified, evaluated for risk, and appropriate safeguards implemented to address the identified threats.

This course will feature:

- Best practice for Security risk assessment, quantification and mitigation
- Key asset identification and vulnerability assessment
- How to document appropriate safeguards in Security plans to mitigate liability
- How to manage and successfully lead a pro-active multi-disciplined Security team
- How to develop multi-disciplined security projects and implement these effectively

What are the Goals?

By the end of this course, participants will be able to:

- Learn and analyse the full range of threats and risks to their organisation
- Learn skills to combat these threats and put into place standards, plans and strategies
- Understand how to increase the professional reputation and standing of the security role
- Design programs to protect corporate intellectual property and physical assets
- Understand the business reasons why security should be a board level responsibility

Who is this Training Course for?

The course is structured to equip delegates with the specialist security knowledge to perform their management and supervisory duties to international standards in both security planning and asset protection.

This course is suitable to a wide range of professionals but will greatly benefit:

- Security Supervisors & Personnel
- Health, Safety & Environment Practitioners
- Fire Personnel
- Facility Supervisors & Personnel
- HR & Administrative Supervisors responsible for security

How will this Training Course be Presented?

This dynamic course will utilise a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. This includes the use of the use of self-assessment, case studies and awareness tools along with role playing and group activities to enhance your security leadership capability.
